3.5 stars This has to have been one of the surprising mangas I've read this year I admit that I took a while to warm up to this series, but once it starts getting rolling, you can't help but want to keep reading to see what happens next. Considering that the main pace of the story has been just survive, a lot actually happens in this volume, some of which seems likely and some of which doesn't. Plot wise, there's three big stories here. First we have the emergence of the mysterious fighter Yarai and his group, the sudden appearance of a deadly illness that strikes Yarai and Akira's groups, as well as the discovery of what happened to many of the adults from the flight. I admit that I'd been wondering what had happened to the adults and why exactly we hadn't seen them. Their allegiance to their leader is what surprises me, though. What bothered me about the leader is that she's a 10 year old girl, the daughter of a billionaire. While I understand that people tend to like to hold onto the ideas of power and control that they had in stable times even if that power is no longer applicable to the situation, the manga has gone out of its way to highlight how inhuman people can act when you take civilization and the idea of repercussions away. I can't help but find it a little surprising that a young girl would be able to do all of this and not be used as a puppet for someone else. This reveal is done towards the end of the volume, so I imagine that this will be expanded upon in the next volume. Although I do admit that Yarai grabbing the teacher and walking away at the end of the Yarai Akira illness scare sort of made me raise an eyebrow. Why on earth would you really want to go wandering about with a teacher that's still half sick, in an area where you could likely be killed at any given time. I know he's a loner, but you'd think that he would at least stay until she was able to walk on her own. This didn't really bother me as much, as I could rationalize it away somewhat as a character quirk. Art wise, this is on par with the previous volumes. Female characters are still being drawn in all of their fanservice glory, but at this point I imagine that most have either embraced the fanservice, learned to overlook it for the sake of the read, or stopped reading, so this probably won't be too big of an issue. But it is a shame, as this could've been a grittier and serious tale without it, but oh well at least it's not too in the way. The ancient creatures are what really takes the cake, as they're drawn with extreme detail and are often the best parts of the volume. If you've liked the previous volumes, you'll like this one. If not, then this probably won't do much to sway you. This manga would be so much better if they cut out the excessive fan service. In this volume a virus strikes Akira and his crew and they must find the cause and a cure before they all die. They also discover what happened to many of the adults that were on the plane. The fact that the adults are being led by a ten year old seemed a bit ridiculous to me. This manga is like Lost meets Lord of the Flies. The survivors have become divided into separate groups each with its own leader. Akira's group seems the most sane of all of them. In the short period of time since the plane crash, the other survivors seem to have lost any sense of human decency, spiraling out of control and committing murder and attempting rape. I have been told to keep giving this series a chance. I just cannot get into this story. I cannot put my finger on exactly what I do not like though.

The gore isn't that bad. The story is just a little lacking in my opinion. I am still going to keep going in hopes that it will improve. Here's only hoping. This series continues to have a gripping storyline. Yes, I could live without the panty shots. 3.5 Stars. It's OK, not great and not bad; you can say it's enjoyable with some interesting events here and there.
