WOLVERINE

THE LONG NIGHT

"Compelling,
instigating,
complex."

—Matthew Green

MARVEL

3.5 Didn't listen to the podcast but this was quite good if not for some heavy dialogue. Wolverine really didn't feature that much. I had my ups and downs with this. Ultimately, I enjoyed it. But it was not what I thought it should be. For a story with Wolverine in the title, he is not close to really being the main character. Maybe I have to say about the marketing of this story. But would have liked to see Wolverine as much of a focal point. Was not a fan of the twist at the end, didn't think it was at all needed. It changed the story for me and not in a positive way. I did like the story and would look forward to it. Certainly would have described the story much of a mystery, almost detective like in style. Wolverine has long been my favorite comic book character. This is supposed to be some milestone for Marvel and starting a line of scripted podcasts, and it was pretty good to listen to. I did expect to follow the Wolverine though, but we actually see the story play out through the eyes of the special agents, who personally I could've cared less about, and for this reason I am rating it lower than I normally would. It's pretty neat that the setting is in Alaska. Wolverine went up there to be isolated. It's worth a listen if you like comic book media. I listened to it for free on Podcast Republic. I've found my new favorite podcast. Excellent voice work, great atmosphere, decent story, if a little thin on substance. Bob Balaban is especially good, but that's always the case, isn't it? Richard Armitage is a perfect Logan. I hope they put a little story, a little fewer long, atmospheric pauses in the next one. This first Marvel podcast revolves around two federal agents who travel to a sleepy Alaskan town to investigate murders with telltale signs of mutant, particularly Wolverine activity. The production features top quality voice actors and sound design that fidget spinner, and a sinuous plot that kept me guessing until the bombshell ending. We actually don't get to hear from Logan that much, but he's definitely the same Weapon X produced, heed no warning, reluctant killer with a heavy conscience whom we know and love. Definitely worth a listen. The five stars are just for casting Richard Armitage as Wolverine. How ingenious. What a voice. But he hardly has any lines until episode 10, the last one, which was rather disappointing, and most of the scenes involving him are told in retrospect, which makes them kinda dull. Still, I'll definitely listen to the next Wolverine podcast as well when it comes. Not sure what I thought about this podcast book. It was fun to listen to this book and enjoyable to learn about Wolverine. But the story lacked so much. They rushed the climax, they rushed revealing all of the secrets, and they ended in a pathetic way. There are way too many unanswered questions like did Weapon X get what they wanted? Why did Wolverine help take out the Langrocks? What happened to the agents? Why were they robots? What was with the cult? I can go on and on.
